DH_Dream for Final Cut

Introduction:

DH_Dream is a transition effect for Final Cut Pro/Express that produces a dream or flashback effect between two clips.

To complete the dreamy experience, DH_Dream comes with two specially created and royalty-free harp glissando sound effects.

If you find this plug-in useful then please do tell your friends and colleagues but please don't just give them a copy.... We deliberately make all our plug-ins available individually so they are as affordable as possible.

The more plug-ins we sell, the more we will be encouraged to develop new and useful plug-ins in the future.
