## DH\_WhipPan for Final Cut

### Introduction:

DH\_WhipPan v1.0 is a transition effect for Final Cut Pro/Express which gives a camera whip pan effect between two clips. The effect can be set to affect both clips (whip in/out) or just one clip.

DH\_WhipPan comes complete with five specially created and royalty-free "whoosh" sound effects.

**If you find this plug-in useful then please do tell your friends and colleagues but please don't just give them a copy.... We deliberately make all our plug-ins available individually so they are as affordable as possible.**

**The more plug-ins we sell, the more we will be encouraged to develop new and useful plug-ins in the future.**

### Installation:

#### Final Cut Pro v4 (or later) on OSX

To install for all users (requires administrator privileges), copy the DH\_WhipPan plug-in to:  
*Macintosh HD/Library/Application Support/Final Cut Pro System Support/Plugins*

To install for current user only, copy the DH\_WhipPan plug-in to:  
*Macintosh HD/Users/[Currentusername]/Library/Preferences/Final Cut Pro User Data/Plugins*

#### Final Cut Express v2 (or later) on OSX

To install for all users (requires administrator privileges), copy the DH\_WhipPan plug-in to:  
*Macintosh HD/Library/Application Support/Final Cut Express System Support/Plugins*

To install for current user only, copy the DH\_WhipPan plug-in to:  
*Macintosh HD/Users/[Currentusername]/Library/Preferences/Final Cut Express User Data/Plugins*

### Controls:

#### Type

##### *Whip Out*

This applies the effect to the 1st clip only, resulting in a whip out on the 1st clip and a cut to the 2nd clip.

##### *Whip Out/In*

This applies the effect to both clips by whipping out the 1st clip and dissolving to the 2nd clip as it whips in and settles.

##### *Whip In*

This applies the effect to the 2nd clip only, resulting in a cut to the 2nd clip as it whips in and settles.

#### Direction

Angle control sets the direction of the camera movement. Values of 0, 90, 180 and 270 degrees are possible.

#### Frame Rendering

When checked this forces frame rendering of the effect rather than the default field rendering.

### Sound Effects:

Five specially created and royalty-free sound effects are included with DH\_WhipPan. The effects are stereo 48Khz, 16 bit AIFF files and all have the whoosh panning from right to left.

If you need to make the stereo effect less extreme then simply move the "Pan" slider in the viewer towards "0".

You can make the whoosh pan from left to right by setting the "Pan" slider in the viewer to "1".
